

TNO LUNCH LECTURE

DEMO Malware in Android App

Gerben Broenink will show the possibilities for injecting malware into existing android applications, using public available tooling. During the demo, a manipulated AngryBirds app will be used to gain control of a smartphone.

Gerben Broenink
Security Specialist

DEMO FlexiblePower App. Interface

Wilco Wijbrandi will show the Flexible Power Application Infrastructure (FPAI). The FPAI is a home automation platform which can connect with all the smart devices in your home. You can use the platform to install applications that control your devices or connect to the smart grid.
