CGI

Programming & Business Challenges

CGI thinks that Hydrogen is one of the building blocks of a carbon-neutral future. Through actionable data insights and smart digital solutions, CGI helps energy companies accelerate the energy transition and achieve leadership positions in an integrated hydrogen economy.

PROGRAMMING CHALLENGE:

In the coding challenge CGI invites you to show off your skills in 6 hydrogen themed assignments ranging from easy to hard.

The assignments can be executed in either Python, C or Assembly.

BUSINESS CHALLENGE:

To compete in this challenge you have to answer the following question:

What is your vision on how IT could empower the energy transition regarding hydrogen technologies?
